

Ryan Koch

React Native Mobile Engineer | TypeScript | iOS & Android

Virginia Beach, VA | (719) 466-9555 | ryan@ryankoch.me | ryankoch.me | github.com/ryankoch13

PROFESSIONAL SUMMARY

React Native Mobile Engineer with 4+ years of production experience building, debugging, and shipping cross-platform iOS and Android applications. Strong background in TypeScript, React Native upgrades, native mobile troubleshooting, release workflows, and customer-focused product development. Experienced contributing to secure digital identity and verifiable credential products in collaboration with government organizations, open-source communities, and Linux Foundation initiatives.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Ruby, Python

Mobile & Frontend: React Native, React, Expo, Angular, iOS, Android, responsive UI

Backend & Data: Ruby on Rails, Firebase, Firestore, Supabase, PostgreSQL

Mobile Tooling: Xcode, Android Studio, CocoaPods, Gradle, App Store Connect, Google Play Console, CI/CD workflows

Development Tools: Git, GitHub, VSCode, JIRA, Slack, Coda, Figma, GSuite, Microsoft Office

AI & Workflow: AI-assisted debugging, prompt engineering, OpenAI API integration, developer workflow automation

PROFESSIONAL EXPERIENCE

Indicio — Mobile Engineer | *Virginia Beach, VA*

July 2021 - Present

- Build and maintain production React Native applications for iOS and Android supporting secure digital identity and verifiable credential workflows.
- Own mobile feature delivery from scoping and implementation through QA, customer feedback, deployment support, and post-release iteration.
- Debug complex cross-platform issues involving React Native, native iOS/Android behavior, dependency upgrades, CocoaPods, Gradle, Xcode, and Android Studio.
- Collaborate with government organizations, Linux Foundation initiatives, open-source contributors, and customer stakeholders to improve secure identity products.
- Contribute reusable UI components, application logic, release workflows, and documentation across TypeScript and JavaScript mobile codebases.
- Support app reliability through production bug fixes, upgrade work, crash investigation, and platform compatibility testing.

DoctorMultimedia — Web Developer | *San Diego, CA*

Jan 2021 - Oct 2021

- Built and maintained client websites focused on brand presence, usability, SEO, and customer engagement.
- Delivered front-end updates, layout improvements, SEO-oriented fixes, and support ticket resolutions across multiple client sites.
- Prioritized high-volume customer requests by urgency, business impact, and technical complexity while communicating directly with internal teams and clients.

The VanLife App — Mobile Development Intern | *San Diego, CA*

Sept 2020 - Dec 2020

- Redesigned and improved the team admin dashboard with a focus on usability, scalability, and maintainability.
- Quickly ramped up on Angular and Firebase/Firestore to contribute independently with minimal oversight.
- Supported product development by implementing UI improvements, data-driven features, and internal tooling updates.

24-7 Intouch — Quality Manager | *Orlando, FL*

Jan 2017 - Feb 2020

- Managed quality operations for a department of 100+ employees and partnered with leadership to improve operational outcomes.
- Reduced QA errors by 62% within six months through improved coaching processes, clearer workflows, and stronger feedback loops.
- Designed training programs and analyzed quality trends to improve consistency, performance, and team morale.

SELECTED PROJECTS

Alliance Ops / Last War Tracker / *React Native, Expo, TypeScript, Supabase, PostgreSQL*

- Built a collaborative mobile operations dashboard for shared member tracking, alliance events, daily stats, and train assignment workflows.
- Implemented invite-code onboarding, role-based workflows, Supabase-backed persistence, and relational data modeling for shared alliance data.
- Designed practical tracking flows for member power, donations, versus scores, HQ levels, and assignment history.

ChatGPT React Native / *React Native, TypeScript, OpenAI API*

- Developed a React Native-focused project exploring reusable ChatGPT integration patterns and AI-powered mobile workflows.
- Structured API integration patterns with security-conscious guidance around API key handling in mobile applications.
- Used TypeScript-first architecture to experiment with reusable components and mobile AI user experience patterns.

Personal Portfolio / *React, Vite, Responsive CSS*

- Designed and deployed a responsive developer portfolio highlighting mobile engineering experience, selected projects, and technical skills.

EDUCATION

LEARN Academy — Full Stack Web Development Bootcamp, 2020 / *San Diego, CA*
